Summary

Full Stack Developer skilled in building scalable web applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, Redis, and REST APIs.

Experienced in developing production-oriented applications with authentication, payments, AI integrations, caching, real-time communication, background processing, Docker, and cloud deployment.

Seeking a entry-level software Developer/ SDE role to contribute to production systems while growing backend engineering expertise.

Projects

Redis Job Queue — Asynchronous Job Processing System

GitHub

TypeScript, Node.js, Redis, Docker, AWS EC2, Nginx, GitHub Actions

- Built a Redis-backed asynchronous job processing system with priority scheduling, atomic Lua-script job claiming, deduplication, job-state tracking, and multi-worker processing.
- Implemented automatic retries with exponential backoff, delayed-job scheduling, Dead Letter Queue (DLQ) handling, and REST-based job monitoring and replay for failure recovery.
- Deployed the API, Redis, and workers using Docker Compose on AWS EC2 behind Nginx, with GitHub Actions CI/CD and a self-hosted runner for automated deployment.

FeedsOut — Full-Stack Social Media Platform

Live Demo — GitHub

React.js, Node.js, Express.js, MongoDB, Redis, ImageKit, Inngest, SSE, Docker, Vercel

- Developed a production-ready MERN social media platform with secure authentication, image sharing, likes, follow system, profiles, and modular REST APIs.
- Implemented Redis caching with a **60-second TTL** and rate-limited connection requests to **20 requests per user per 24 hours**, improving backend efficiency and abuse prevention.
- Implemented real-time private messaging using **Server-Sent Events (SSE)** and Inngest background jobs, while containerizing the application with Docker and Docker Compose.

NeptuneAI — AI SaaS Platform

Live Demo — GitHub

React.js, Node.js, Express.js, PostgreSQL, Redis, Clerk, Cloudinary, Multer, OpenAI API, Vercel

- Built a full-stack AI SaaS platform providing AI-powered blog, article, image generation, object removal, background removal, and resume review features.
- Integrated Clerk authentication and authorization, PostgreSQL, Cloudinary media storage, and secure REST APIs while implementing subscription-based premium AI services.
- Optimized repeated AI requests using Redis caching, reducing redundant API calls by up to **90%** and improving response time for frequently requested prompts.

Technical Skills

Programming Languages C++, JavaScript, TypeScript, SQL

Frontend React.js, Next.js, HTML5, CSS3, Tailwind CSS, Motion (Framer Motion)

Backend Node.js, Express.js, REST APIs, Clerk Authentication, Authorization, JWT, Stripe

Databases & Storage MongoDB, PostgreSQL, Redis, Cloudinary, ImageKit

Developer Tools Git, GitHub, Docker, Docker Compose, Nginx, AWS EC2, GitHub Actions, Postman, VS Code, Vercel

Core Computer Science Data Structures & Algorithms, Object-Oriented Programming, DBMS, Design Patterns

Education

Indian Institute of Information Technology, Ranchi

Dec 2021 – Jul 2025

Bachelor of Technology (B.Tech.) in Electronics and Communication Engineering

CGPA: 7.93/10

Coding Profiles & Achievements

- Solved **400+** Data Structures and Algorithms problems on LeetCode, strengthening algorithmic problem-solving skills.
